

NICO PLUS

Plant growth promoter

A carefully researched biological concentrate, which can be readily diluted with water in a homogeneous emulsifiable form ready for foliage spray in agriculture and horticulture crops.

NICO PLUS contains fatty alcohol and other growth factors and bio stimulants having higher absorption capacity through foliage. It enhances growth in a natural way that allows plants to make better use of available moisture and plant nutrients. It also increases cell division and enlargement which can lead to better quality products. It provides strength to withstand abiotic and biotic stress like drought and diseases. It also reduces immature flower / fruit dropping.

Application Guidelines:

It is safe to handle, non toxic and blends well with liquid pesticides and fertilizers, making field application easy and economical.

For assured results, the foliar spray is to be applied at critical growth stages of flowering and fruiting.

Dosage:

Mix 5 ml in 1 Litre of water.

Packaging:

1000 litres tank

200 litres barrel

5 litres carboy

1 litre plastic bottle

500 ml. plastic bottle

Storage:

NICO PLUS can be stored at room temperature but away from direct sunlight.
